**ENGLISH GAME BECOMING**  
A POPULAR SPORT.

Soccer is Growing With Rapid Strides  
Throughout the Country.

The game which is bound to be popular in any country is the game which the poor boy can play without great expense. One of these is baseball, another is soccer. Both are open air sports, and both require about the same qualities, viz., speed, brains and skill.

Soccer is the game of the proletariat in England; cricket the game of the wealthy. Soccer has spread to all corners of the earth in the wake of the colonizing Englishman. It has spread all over Europe and the soldiers in the great war play it between battles. It has grown with rapid strides in America until now there are teams here which can put up creditable exhibitions of the sport.

Some of the great English teams have been known to come over here and get a setback which no more expected than did the American baseball teams that first went to Cuba and found the islanders could every now and then put one over on them.

Speed, brains and ability to use the feet with as much accuracy as the hands are necessary in the making of a great soccer player. It is seldom that a player who has not been at the game from childhood is of much use. The kicking is the hardest part of the game to learn. It requires more practice than hockey or lacrosse, or baseball, as in these games the hands are used most, while in soccer the hands are out of the game.

Soccer is a comparatively new game. It is not 50 years old. In the early '70s it was tried out in England and an association formed. In which the rugby game was discarded and the association game was named. This football association gave its name to the kicking game, as rugby had therefore been known as football, even as it is in the United States.

Among the American and Canadian-born players it is usually referred to as this day as association football.

## 181st Dividend

Office of The Norwich Savings Society  
Norwich, Conn., Dec. 12, 1914.

The Directors of this Society have declared out of the earnings of the current six months a semi-annual dividend at the rate of **FOUR PER CENT**, per annum, payable to depositors entitled thereto on and after January 15, 1915.

## ROWLAND TO MANAGE WHITE SOX

Baseball World Taken by Surprise When Clarence Henry Rowland Was Announced as Pilot for 1915—New Leader Jumps From a Class B Circuit—Rumored Kid Gleason Will Manage the Yankees—Callahan Will Join the Business Department of the Club.

Chicago, Dec. 17.—To the complete surprise of baseball writers, press and public, Clarence Henry Rowland, last year pilot of a team in a class B circuit, today was named manager of the Chicago American league club, conceded to be a pennant contender in 1915. Many Chicago baseball followers had never heard of Rowland, but in professional baseball circles he was well known as a successful manager of minor league clubs.

The new leader left the ranks of players for his first manager's position at Aberdeen, Washn., in 1903. Thence he went to Jacksonville, Fla., and then returned to Duquesne, Pa., to manage the Peoria team in the Three I league, taking it from last place to second.

Rowland will assume his new duties soon. His arrival will be the signal for the retirement of James J. Callahan, who has led the Chicago Americans three seasons. Callahan will be appointed to some position connected with the business affairs of the club, it was announced, with the idea that eventually he will be able to shoulder some of the duties now falling to Owner Comiskey.

The disposition of Kid Gleason, coach and advisor to Callahan, was not given out, but it was rumored he would be appointed manager of the New York Americans.

The shift in management, with the appointment of Eddie Collins as captain in place of Weaver, indicates a change in the field policy of the White Sox.

Rowland was born in Plattville, Wis., and in 18 years old. His contract as Sox manager is for one year. The salary was not announced.

**TENNIS ASSOCIATION WILL HOLD IMPORTANT MEETING**  
Expected to Be Most Important in the History of the Association.

New York, Dec. 17.—The meeting of the executive committee of the United States Tennis Association, which is expected to be the most important in the history of the association, will be held here tomorrow. The chief business will be the report of the national ranking list prepared by R. C. Inman, chairman, W. M. Hall and J. D. Davis. The report of the rating committee is said to mark an epoch in American lawn tennis.

P. E. Presbury, Boston, will report on awarding a standard gold medal to all national champions. George T. Adee will report as to the tests to be made of the professional element of tournaments should be subjected. A. L. Hoskins, Philadelphia, will report on the adoption of official colors and a seal for the association. R. D. Little will offer elaborate plans for the institution of tournaments for schoolboys and college students. No action will be taken as to changing the national championship from Newport to other courts at this meeting.

E. F. Torrey, of Clinton, New York, secretary of the national body, will present a report on the making of a trail to the prospect of Davis cup matches next year. The advisability of the corresponding with other associations will be discussed but will not be acted upon until the annual meeting in February in this city. Torrey has prepared elaborate reports of the Davis cup matches.

**FINANCIAL AND COMMERCIAL**

**STOCK PRICES DROPPED.**

On a Smaller and More Contracted Volume of Operations.

New York, Dec. 17.—Stocks continued to drop today on a smaller and more contracted volume of operations. Trading seemed to be largely for that fraction of the professional element committed to the short account and when the demand from that quarter had spent itself, the market fell idly towards lower quotations. The significance of the session as a whole may be judged from the fact that a relatively inoperative specialty—Central Leather—was the most active feature, with a gain of 1-1/2 points. The corresponding decline in the price of leather was also noted. The movement followed the further extension of the French moratorium.

Preparations for the loaning of money by the \$125,000,000 cotton pool were finally completed, local financial institutions contributing their quota of \$50,000,000. Call money was offered at 3 per cent, but time loans hardened a fraction for long dates.

Apart from a gain in gold, the weekly statement of the Bank of England throws no light on the situation in that quarter. London's markets reflected a mild degree of alarm occasioned by the recent bombardment of British coast towns.

Bonds were again irregular, with contrary movements in some of the speculative issues. Total sales, par value aggregated \$1,302,000.

U. S. government bonds were unchanged on call.
